Efficiency, Quality, Reliability

About us

GDP Pharm Logistics is a leader in providing a full range of logistics services in the field of national and international clinical research, in the pharmaceutical, biotechnological and healthcare industries.

The main international directions are Russia and the CIS countries. Our company provides services in compliance with GDP standard.

Transportation of dangerous goods, including infected biological samples

Customer-specific approach to each Client. Individual rates

Own production of GDPack insulated shippers and thermoelements

Customs clearance in a short time

Urgent procurement

Transportation quality assurance and cargo insurance

**High-skilled and reliable company employees, work experience (more than 10 years)
10 лет**

Possibility of delivery to district cities remote from regional centers

Representatives of the company in more than 100 cities of the Russian Federation

Personnel

The team includes high-level professionals. Over the years, a close-knit team of like-minded people has been created who value their work and are aimed at a positive result

More than 160 customer-oriented employees who are ready to quickly and efficiently solve all emerging issues. Personal manager and personal customer service.

Regular trainings, advanced training.

A staff of experienced drivers-forwarders trained to work with thermolabile and dangerous cargo. Availability of ADR certificates for the transport of dangerous goods.

Our services

- ✓ Customs clearance and regulatory support
- ✓ Transport logistics
- ✓ Providing of own manufactured insulated shippers for medical use
- ✓ Warehouse logistics
 - Storage
 - Purchase
 - Destruction

Customs clearance

Customs clearance

- ✓ We carry out customs clearance in any region of Russia and outside the country
- ✓ Preparation of export and import documents as soon as possible (up to three hours)
- ✓ Customs clearance from 2 hours
- ✓ Storage at temporary storage warehouse
- ✓ Dangerous goods clearance
- ✓ Use of own funds to pay VAT and duties

Regulatory support

- ✓ Obtaining permission from the Ministry of Health to import / export drugs and biological samples for clinical trials
- ✓ Obtaining permission at Roszdravnadzor for the import / export of biological samples for other purposes
- ✓ Obtaining additional certificates, permissions, licenses required for customs clearance

Logistics

- ✓ Transportation of drugs, concomitant therapy, laboratory kits, biological samples (including infected ones) and medical equipment.
- ✓ Own vehicle fleet. Subcontractors are not used.
- ✓ Optimal route selection. Delivery to restricted-access cities and remote settlements
- ✓ Urgent delivery within 3-4 hours within one city
- ✓ Urgent and economy cargo delivery «from hand to hand» throughout the Russian Federation, CIS countries
- ✓ Provision of additional equipment, packaging material
- ✓ Load/unload handling and lifting activities
- ✓ Online Cargo Tracking System

Transportation is carried out strictly in accordance with the GDP standard and the order 646n dated 31-Aug-2016 "Approval of the rules of good storage and transportation practice of medicines for medical use"

Transportation temperature regimes:

from +15 to +25 °C

from +2 to +8 °C

from -15 to -25°C

Deep freeze

- ✓ Transportation from -25C to + 25C is carried out with the provision of validated insulated shippers and thermoelements of our own production.
- ✓ Transportation of deep frozen products is carried out with the provision of validated insulated shippers with dry ice provided by reliable supplier
- ✓ Order of validated vehicle-refrigerator. Service "Vehicle order from door to door"
- ✓ Temperature monitoring throughout the transport by calibrated temperature loggers, which comply with GxP and 21 CFR Part 11 и EN 12830 demands. Readings of loggers are available at personal Client account 24/7

Insulated shippers for medicinal use

GDPPharm Logistics is a developer and manufacturer of the know-how GDPack insulated shippers and thermoelements.

The unique configuration of thermoelements ensures a stable location and integrity of the Client's cargo. The use of GDPack insulated shippers guarantees compliance with the required temperature regime at the contract level (our company is one of the few that gives such guarantees)

GDPPharm Logistics temperature equipment allows to guarantee the maintenance of the required temperature regime in extreme conditions for up to 96 hours, which is an indisputable advantage, especially for drugs and biological samples transportation in a frame of clinical trials.

Insulated shippers for medicinal use

5 types of insulated shippers are used to ship thermolabile drugs and materials::

- ✓ **GDP - 4L**
- ✓ **GDP - 9L**
- ✓ **GDP- 20L**
- ✓ **GDP- 43L**
- ✓ **GDP- 68L**

All insulated shippers are made of rigid polyurethane foam and polyvinyl chloride which ensures the integrity and reliability of thermal equipment during transportation.

Insulated shippers are additionally equipped with a bag-cover made of moisture-proof polyester or a corrugated box.

Applicable thermoelements:

white color –temperature +15...+25°C

blue color - temperature +2...+8°C

red color - temperature -15...-25°C

Temperature equipment and configuration is validated in accordance with international standards at regular intervals. The fundamental criteria during validation are the standards of the International Safe Transportation Association - ISTA (USA), as well as the use of additional stress tests (artificial creation of critical conditions) to provide a 100% guarantee of proper transportation.

GDP-4L, GDP-9L, GDP-20L Shippers

GDP-4L

- ✓ External dimensions without packaging: 32x32x31 cm
- ✓ Internal useful volume for the Client's cargo: 16x16x16 cm
- ✓ Compliance with temperature conditions for up to 72 hours

GDP-9L

- ✓ External dimensions without packaging: 53x34x33 cm
- ✓ Internal useful volume for the Client's cargo: 35x16x16 cm
- ✓ Compliance with temperature conditions for up to 72 hours

GDP-20L

- ✓ External dimensions without packaging: 53x53x33 cm
- ✓ Internal useful volume for the Client's cargo: 35x35x16 cm
- ✓ Maintaining temperature conditions for up to 96 hours

GDP-43L, GDP-68L Shippers

GDP-43L

- ✓ External dimensions without packaging: 55x55x54 cm
- ✓ Internal useful volume for the Client's cargo:
 - ✓ 35x35x35 cm
- ✓ Maintaining temperature conditions for up to 96 hours

GDP-68L

- ✓ External dimensions without packaging: 78.5x64x51 cm
- ✓ Internal useful volume for the Client's cargo:
 - ✓ 57x40x28 cm
- ✓ Maintaining temperature conditions for up to 96 hours

** When providing dry ice, the internal usable volume may vary due to the physical properties of dry ice, client cargo size/volume and the lack of an internal cardboard box.*

Our warehouse

The modern GDP Pharm Logistics warehouse complex ensures the good storage conditions and timely handling of the Client's cargo. All warehouse premises and storage areas are validated and qualified. All temperature equipment undergoes regular technical maintenance.

- ✓ Pharmaceutical License Availability
- ✓ Warehouse operation 24/7
- ✓ Storage of thermolabile and non-temperature cargo
- ✓ Cross-docking
- ✓ Centralized temperature and humidity control
- ✓ Deconsolidation of cargo
- ✓ Destruction of materials at the Client request

Procurement of comparators and ancillary materials

GDP Pharm Logistics provides:

- prompt request processing
- reasonable prices
- suppliers reliability
- time-efficient delivery
- cold chain packaging if required
- storage in accordance with temperature requirements
