Efficiency, Quality, Reliability

## About us

**GDP Pharm Logistics** is the top company leading in logistics services for national and international clinical research in the pharma-, bio- and healthcare industries.

Our main course includes Russia, Europe, the USA and the CIS countries. We provide services according to GDP standards.

**Dangerous cargo transportation including infected biological samples**

**Case-by-case approach to each client. Individual tariffs**

**Our own top-notch GDPack insulated shippers and thermo-elements production**

**Customs clearance in tight deadlines**

**Prior purchasing**

**High-quality transportation and cargo insurance**

**Qualified and reliable team with more than 10 years of best practices**

**Out-settlements delivery**

**Company's representatives in more than 100 Russian cities**

## Our team

**GDP Pharm Logistics** team are craft professionals. Over the years we united people valuing their work and aiming high

More than 190 client-oriented employees will responsively resolve any issues arised. Personal managers and individual approach to each Client

Regular training and professional development

Experienced freight forwarders, trained to work with thermolabile and dangerous cargo. ADR transportation certificates

## Services

- ✓ Customs clearance and regulatory support
- ✓ Transport logistics
- ✓ Our own production of insulated shippers for medical use
- ✓ Warehouse logistics
  - Storage
  - Purchasing
  - Destruction

## Customs clearance

- ✓ Customs clearance in every Russian region and abroad from 2 hours
- ✓ Export and import document in tight deadlines up to 3 hours
- ✓ Storage in our warehouse
- ✓ Dangerous cargo registration
- ✓ Payment of VAT and duties

## Regulatory support

- ✓ Ministry of Health authorization for the import/export of medication and biological samples for clinical research and for other purposes
- ✓ Ministry of Health authorization for the import/export of medication and biological samples for other purposes
- ✓ Obtaining additional certificates, permissions, licenses required for customs clearance

## Transport logistics

- ✓ Transportation of medications and therapy, laboratory kits, biological samples (including infected ones) and medical equipment
- ✓ Own vehicle fleet. Subcontractors are not used
- ✓ Optimal delivery to restricted-access cities and to out-settlements
- ✓ Prior delivery within 3-4 hours inside one city
- ✓ Urgent and economy cargo delivery «from hand to hand» throughout Russia, the CIS countries and Europe
- ✓ Additional equipment, packaging material
- ✓ Cargo handling operations
- ✓ Online Cargo Tracking System

Transportation is carried out strictly in accordance with the GDP standard and the order 646n "Approval of the rules of good storage and transportation practice of medicines for medical use"

GDP Pharm Logistics also owns an official Broker's license.

## Thermolabile cargo transportation

### Transportation temperature regimes:

From +15 to +25 °C

From +8 to +15 °C

From +2 to +8 °C

From -15 to -25 °C

Lower than -60C - Dry Ice

- ✓ Transportation from -25C до +25C is carried out with validated insulated shippers and thermoelements of our own production
- ✓ Transportation with temperature lower than -60C is carried out with validated insulated shippers with dry ice provided by our reliable supplier
- ✓ Providing validated refrigerator vehicle. Door-to-door service
- ✓ Temperature monitoring during the entire transportation by the temperature recorders

# Temperature monitoring

Temperature monitoring is carried out by well-known international brand **Testo** devices, according to GxP standards and 21 CFR Part 11 and EN 12830 requirements.

Our Client can download data from the device in a personal account on the company's website.

*USB temperature recorders, Client downloads the data by the time of delivery*

*A temperature recorder without a USB port, data can be downloaded in Client's account on the website after delivery*

# Insulated shippers for medical use

GDP Pharm Logistics develops and manufactures the know-how GDPack thermal containers and thermoelements.  
Their unique configuration makes our Client's cargo stable and safe.  
GDPack thermo equipment guarantees the required temperature regime at a legal level (not many companies can give such guarantees)

We guarantee the required temperature regime in extreme conditions for up to 96 hours, which is an absolute strength, especially for medications and biological samples transportation for clinical research

## Insulated shippers for medical use

For a thermolabile cargo transportation we use 4 kinds of thermal containers:

- ✓ **GDP - 4L**
- ✓ **GDP - 9L**
- ✓ **GDP- 20L**
- ✓ **GDP- 43L**

All of them are made of rigid polyurethane foam and polyvinyl chloride which make thermal equipment stable and safe the during transportation.

Thermal containers are additionally equipped with a bag-case made of moisture-proof polyester or a corrugated box.

### Thermoelements used:

- ✓ white – temperature range +15...+25°C
- ✓ blue – temperature range +2...+8°C
- ✓ red – temperature range -15...-25°C
- ✓ additional - temperature range +8...+15°C

Temperature equipment and configuration is validated according to international standards in a regular basis. The fundamental criteria during validation are the International Safe Transit Association- ISTA (USA) standards, as well as additional stress tests (in artificial critical conditions) to provide a 100% guarantee of proper transportation

## GDP-4L

- ✓ External dimensions without package: 32x32x31 cm
- ✓ Internal net volume for the Client cargo: 15x15x15 cm
- ✓ Keeps the temperature up to 72 hours

## GDP-9L

- ✓ External dimensions without package: 51x32x31 cm
- ✓ Internal net volume for the Client cargo: 34x15x15 cm
- ✓ Keeps the temperature up to 72 hours

## GDP-20L

- ✓ External dimensions without package: 53x53x33 cm
- ✓ Internal net volume for the Client cargo: 34x34x15 cm
- ✓ Keeps the temperature up to 96 hours

## GDP-43L

- ✓ External dimensions without package: 55x55x54 cm
- ✓ Internal net volume for the Client cargo: 34x34x34 cm
- ✓ Keeps the temperature up to 96 hours

# Warehouse logistics

The modern GDP Pharm Logistics warehouse complex secures optimal storage conditions and timely handling of the Client's cargo. All warehouse departments and storage areas are validated and qualified. All temperature equipment undergoes regular technical maintenance.

- ✓ Pharmaceutical License
- ✓ Warehouse regime 24/7
- ✓ Thermolabile and non-temperature cargo storage
- ✓ Temperature storage regimes:
  - from +15 to +25 °C
  - from +2 to +8 °C
- ✓ Cross-docking
- ✓ Centralized temperature and humidity control
- ✓ Cargo deconsolidation
- ✓ Destruction of materials by request

## Purchase of comparators and concomitant therapy

### GDP Pharm Logistics provides:

- responsive request processing
- reasonable prices
- suppliers reliability
- time-efficient delivery
- cold chain packaging if required
- storage in accordance with temperature requirements
